

# Save money with Brother MPS

## Designed for cost efficiency

In business, it is essential to keep costs under control and printing is an area that is too often overlooked. That's why we're offering managed print services (MPS) from Brother.

## How will it save you money?

MPS offers a range of cost efficiency benefits to small businesses. These apply whether a company has just one or two devices, or a larger fleet.

It can **reduce costs by removing charges for unplanned maintenance**. It cuts the hidden costs that come with self-managing printers, including the time spent setting up machines and systems, responding to issues and handling supplies.

**Automatic supplies re-ordering** means new ink or toner cartridges arrive ready to be installed whenever they are needed, so you don't have to give them a second thought.

Finally, depending on the contract you choose, an MPS could help **reduce your capital expenditure on printers by leasing them instead**. This will make it simpler and more cost-effective for you to make sure your **technology stays up-to-date**.

## MPS: the key cost benefits

- ✓ Automatic supplies re-ordering
- ✓ Enhanced visibility over printer usage to optimise devices and control all print-related costs
- ✓ A range of flexible payment and leasing options available to suit your needs
- ✓ Minimised printer downtime and improved reliability, meaning an end to staff frustrations and hidden call-out costs.
