

Positively relentless

Pressing on is in our DNA

While our full fibre rollout to 8M premises has continued to accelerate, reaching further towns and cities across the UK, we've worked relentlessly to support our channel partners throughout this challenging year with multiple promotions, additional city launches and ongoing marketing support to help them maintain momentum and secure new long-term business.

Our business services are available to our wholesale partners across 29 towns and cities today, with 67 projects already underway. Our full fibre network is expanding at pace, connecting not just businesses but entire communities.

Building a legacy is the CityFibre way
Be a part of it
