

At Digital Wholesale Solutions, we have partnered with CityFibre to bring you two fantastic new fibre Ethernet products. CityFibre has been rolling out their fibre-only network for the past few years, targeting towns and cities where other major providers are less prominent, and they now offer fantastic value products. Through our partnership, you can choose to provide your customers with dedicated full fibre Ethernet or a shared fibre service called **Fibre Flex**.

#### INDEPENDENT NETWORK INFRASTRUCTURE

Carrier-class, resilient ring-based architecture completely separate from other network providers such as Openreach, Virgin Business and Colt

HIGHLY COMPETITIVE  
Enables DWS partners to differentiate their service offering

#### AVAILABLE IN 28 TOWNS AND CITIES

Delivering fantastic value products to where other major providers are less prominent

#### SELF-SERVICE PORTAL CAPABILITIES

DWS connects into the CityFibre network, enabling partners to quote, order and service those products with the same Wires only, Managed and Monitoring services available on all our Dedicated Internet Access Ethernet products

#### BUILT-IN SMART CAPABILITIES

A network designed from scratch to service the digital age, CityFibre continue to invest in their network and software platforms, making it readily upgradable to 100Gb and beyond

### Dedicated Full Fibre Ethernet

CityFibre's dedicated full fibre Ethernet offers 100Mb or 1Gb bandwidth options and a dedicated fibre tail from the local POP to the customer's premises.

Guaranteed dedicated symmetrical bandwidth from 10Mb to 1Gb

Service delivered using dedicated fibre to the customer's premises

6 business hour repair SLA\*

### Shared Fibre Flex

Fibre Flex is an ultra-competitive and innovative product that offers a symmetrical, guaranteed 200Mb service but allows the customer to use up to 1Gb whenever possible, at no extra cost. Fibre Flex differs from Dedicated Full Fibre Ethernet because it uses a shared fibre within the tail end that is common between a small number of other customers.

Guaranteed dedicated 200Mb symmetrical bandwidth

Burstable bandwidth up to 1Gb symmetrical

6 business hour repair SLA\*

Delivered using Fibre GPON technology

\*Excludes faults caused by third party damage.

#### CityFibre's network is currently available across 28 locations:
