

# Productive and reliable printing

Epson's latest Replaceable Ink Pack System (RIPS) device offers efficiency and flexibility in the workplace.

## Increase productivity

Print up to 20,000 pages without changing the supplies<sup>1</sup>. With no warm up time, the device offers a fast first out time (FPOT) of just 5.5 seconds.

## Lower TCO

Having far fewer moving parts than equivalent laser-based MFPs, and with few consumable changes, Epson inkjet printers are highly reliable and offer significant financial savings over the lifetime of the device.

## Be more sustainable

Epson's Micro Piezo Heat-Free printhead technology does not require heat in the print process, therefore reducing the power consumption. Furthermore, our RIPS technology creates a minimal need for recycling supplies.

## Enhance functionality with in-house and third party solutions

Gain complete control of printing operations with Epson and its partners solutions, allowing devices to be set up to meet specific and changing business requirements.

## Remotely support and deploy services

Epson Remote Services (ERS) is our cloud-based device monitoring and management system helps service providers to perform accurate remote diagnosis without compromising on security. The embedded agent on the WF-C878R allows for seamless setup and use.
